-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Acknowledgment

1. Receipt of the preliminary amendment filed 7/02/01 has been acknowledged and entered.

Abstract

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "**means**" and "**said**," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Claim Objections

3. Claim 1 is objected to because of the following informalities: The recitation on line 3 "the said steering column" is inappropriate and should be changed to – a steering column --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A person shall be entitled to a patent unless –

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Beirlein (US. patent 5,503,244).

Beirlein discloses a two-wheeled vehicle with its steerable front wheel and its rear wheel interconnected, the vehicle comprising:

a. steering column is dispensed with and a die-shaped six sided module (5) attached to the rotation axle of the front wheel (16) and is connected at least to an upwardly inclined member (17) which is further extended downwardly and is articulated at its other end,

b. a rotation axis parallel to rear wheel axis to an end of a longitudinal bar for connection to the rear wheel of the vehicle.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beirlein and further in view of Albesiano (EP 0 469 475 A1).

Beirlein is disclosed above but lacks the teaching of the central portion of the steerable wheel is formed by a parallelepipedal body.

Albesiano discloses a vehicle suspension system with a central portion (slider element 17) is formed by a parallelepipedal body so as to provide greater mechanical stiffness to the suspension system.

Based on the teaching of Albesiano, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the two-wheel vehicle of Beirlein to include the parallelepipedal central portion of Albesiano so as to provide greater mechanical stiffness to the suspension system.

With regard to claims 3-5, Beirlein as modified by Albesiano discloses all of the claimed limitations.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cocco et al. ('905), Schmidt et al. ('432), Parker ('305), Yamaguchi ('833), Morioka et al. ('881), and Parker ('249) are cited of interest.
